## 2017 IEEE 24th Symposium on Computer Arithmetic

---

- Foreword
- Committees
- Program Committee Members
- Steering Committee
- Title Page (Book version)
- Copyright Page (Book version)
- Table of Contents (Book version)
- Author Index (Book version)
- Publisher's Information (Book version)

# Sessions

- ❑ Session 1: Keynote Talk 1
- ❑ Session 2: Multiprecision Arithmetic
- ❑ Session 3: Algorithms
- ❑ Session 4 — Special Session: Computer Arithmetic and DSP
- ❑ Session 5: Floating-Point Error Analysis
- ❑ Session 6: Hardware for Fast and Reproducible Arithmetic
- ❑ Session 7: Keynote Talk 2
- ❑ Session 8: Arithmetic in FPGAs
- ❑ Session 9 — Special Session: Realizing Efficient Matrix Computations
- ❑ Session 10: Cryptography
- ❑ Session 11: Miscellaneous Topics in Computer Arithmetic

# Papers by Session

## Session 1: Keynote Talk 1

---

- ❑ The Rise of Multiprecision Arithmetic  
*Nicholas John Higham*

# Papers by Session

## Session 2: Multiprecision Arithmetic

---

- ❑ Multiple Precision Floating-Point Arithmetic on SIMD Processors  
*Joris van der Hoeven*
- ❑ Multiprecision Multiplication on ARMv8  
*Zhe Liu, Kimmo Järvinen, Weiqiang Liu, and Hwajeong Seo*
- ❑ Optimized Binary64 and Binary128 Arithmetic with GNU MPFR  
*Vincent Lefèvre and Paul Zimmermann*
- ❑ Implementation and Performance Evaluation of an Extended Precision Floating-Point Arithmetic Library for High-Accuracy Semidefinite Programming  
*Mioara Joldes, Jean-Michel Muller, and Valentina Popescu*

# Papers by Session

## Session 3: Algorithms

---

- ❑ A Parallel Method for the Computation of Matrix Exponential Based on Truncated Neumann Series  
*Vassil Dimitrov, Viduneth Ariyaratna, Diego F. G. Coelho, Logan Rakai, Arjuna Madanayake, and Renato J. Cintra*
- ❑ On Lifting-Based Fixed-Point Complex Multiplications and Rotations  
*Oscar Gustafsson*
- ❑ A Number System Approach for Adder Topologies  
*Alvaro Vázquez and Elisardo Antelo*

# Papers by Session

## **Session 4 — Special Session: Computer Arithmetic and DSP**

---

- ❑ On Improving the Performance Per Area of ASTC with a Multi-output Decoder  
*Kenneth C. Rovers and Sam Elliott*
- ❑ Optimal Streamed Linear Permutations  
*François Serre and Markus Püschel*
- ❑ Approximate Neumann Series or Exact Matrix Inversion for Massive MIMO?  
*Oscar Gustafsson, Erik Bertilsson, Johannes Klasson, and Carl Ingemarsson*
- ❑ Floating Point Tangent Implementation for FPGAs  
*Martin Langhammer and Bogdan Pasca*

# Papers by Session

## Session 5: Floating-Point Error Analysis

---

- ❑ The Classical Relative Error Bounds for Computing  $\text{Sqrt}(a^2 + b^2)$  and  $c / \text{sqrt}(a^2 + b^2)$  in Binary Floating-Point Arithmetic are Asymptotically Optimal  
*Claude-Pierre Jeannerod, Jean-Michel Muller, and Antoine Plet*
- ❑ Certified Roundoff Error Bounds Using Bernstein Expansions and Sparse Krivine-Stengle Representations  
*Alexandre Rocca, Victor Magron, and Thao Dang*
- ❑ Round-off Error Analysis of Explicit One-Step Numerical Integration Methods  
*Sylvie Boldo, Florian Faissole, and Alexandre Chapoutot*
- ❑ ULPs and Relative Error  
*Marius Cornea*

# Papers by Session

## Session 6: Hardware for Fast and Reproducible Arithmetic

---

- ❑ High-Precision Anchored Accumulators for Reproducible Floating-Point Summation  
*David Raymond Lutz and Christopher Neal Hinds*
- ❑ Modified Fused Multiply and Add for Exact Low Precision Product Accumulation  
*Nicolas Brunie*
- ❑ A Hardware Accelerator for Computing an Exact Dot Product  
*Jack Koenig, David Biancolin, Jonathan Bachrach, and Krste Asanovic*

# Papers by Session

## Session 7: Keynote Talk 2

---

- ❑ Large Scale Numerical Simulations of the Climate  
*Jean-Christophe Rioual*

# Papers by Session

## Session 8: Arithmetic in FPGAs

---

- ❑ Flexible Fixed-Point Function Generation for FPGAs  
*Matei Iştoan and Bogdan Pasca*
- ❑ Resource Optimal Design of Large Multipliers for FPGAs  
*Martin Kumm, Johannes Kappauf, Matei Istoaan, and Peter Zipf*

# Papers by Session

## Session 9 — Special Session: Realizing Efficient Matrix Computations

---

- ❑ Accelerating Matrix Processing with GPUs  
*Nicholas Malaya, Shuai Che, Joseph L. Greathouse, René van Oostrum, and Michael J. Schulte*
- ❑ Algorithms and Arithmetic: Choose Wisely  
*George Anthony Constantinides*
- ❑ Optimizing Matrix Multiplication on Intel® Xeon Phi TH x200 Architecture  
*Murat Efe Guney, Kazushige Goto, Timothy B. Costa, Sarah Knepper, Louise Huot, Arthur Mitrano, and Shane Story*
- ❑ QRD for Parallel Arithmetic Structures  
*Martin Langhammer*

# Papers by Session

## Session 10: Cryptography

---

- ❑ Fast Arithmetic Modulo  $2^x p^y \pm 1$   
*Joppe W. Bos and Simon Friedberger*
- ❑ Efficient Leak Resistant Modular Exponentiation in RNS  
*Andrea Lesavourey, Christophe Negre, and Thomas Plantard*
- ❑ A New Multiplicative Inverse Architecture in Normal Basis Using Novel Concurrent Serial Squaring and Multiplication  
*Amin Monfared, Hayssam El-Razouk, and Arash Reyhani-Masoleh*

# Papers by Session

## Session 11: Miscellaneous Topics in Computer Arithmetic

---

- ❑ A Sum Error Detection Scheme for Decimal Arithmetic  
*Alvaro Vazquez and Elisardo Antelo*
- ❑ Reliable Verification of Digital Implemented Filters Against Frequency Specifications  
*Anastasia Volkova, Christoph Lauter, and Thibault Hilaire*
- ❑ Normalizing or Not Normalizing? An Open Question for Floating-Point Arithmetic in Embedded Systems  
*Sonia Gonzalez-Navarro and Javier Hormigo*

# Papers by Author

## **A**

---

- Antelo, Elisardo
- Ariyarathna, Viduneth
- Asanovic, Krste

## **B**

---

- Bachrach, Jonathan
- Bertilsson, Erik
- Biancolin, David
- Boldo, Sylvie
- Bos, Joppe W.
- Brunie, Nicolas

## **C**

---

- Chapoutot, Alexandre
- Che, Shuai

- Cintra, Renato J.
- Coelho, Diego F. G.
- Constantinides, George Anthony
- Cornea, Marius
- Costa, Timothy B.

## **D**

---

- Dang, Thao
- Dimitrov, Vassil

## **E**

---

- Elliott, Sam
- El-Razouk, Hayssam

## **F**

---

- Faissole, Florian
- Friedberger, Simon

# Papers by Author

## **G**

---

- Gonzalez-Navarro, Sonia
- Goto, Kazushige
- Greathouse, Joseph L.
- Guney, Murat Efe
- Gustafsson, Oscar

## **H**

---

- Higham, Nicholas John
- Hilaire, Thibault
- Hinds, Christopher Neal
- Hormigo, Javier
- Huot, Louise

## **I**

---

- Ingemarsson, Carl

Istoan, Matei

Iştoan, Matei

## **J**

---

- Järvinen, Kimmo
- Jeannerod, Claude-Pierre
- Joldes, Mioara

## **K**

---

- Kappauf, Johannes
- Klasson, Johannes
- Knepper, Sarah
- Koenig, Jack
- Kumm, Martin

## **L**

---

- Langhammer, Martin

# Papers by Author

- Lauter, Christoph
- Lefèvre, Vincent
- Lesavourey, Andrea
- Liu, Weiqiang
- Liu, Zhe
- Lutz, David Raymond

## **M**

---

- Madanayake, Arjuna
- Magron, Victor
- Malaya, Nicholas
- Mitrano, Arthur
- Monfared, Amin
- Muller, Jean-Michel

## **N**

---

- Negre, Christophe

## **P**

---

- Pasca, Bogdan
- Plantard, Thomas
- Plet, Antoine
- Popescu, Valentina
- Püschel, Markus

## **R**

---

- Rakai, Logan
- Reyhani-Masoleh, Arash
- Rioual, Jean-Christophe
- Rocca, Alexandre
- Rovers, Kenneth C.

## **S**

---

- Schulte, Michael J.

# Papers by Author

- Seo, Hwajeong
- Serre, François
- Story, Shane

## **v**

---

- van der Hoeven, Joris
- van Oostrum, René

## **v**

---

- Vazquez, Alvaro
- Vázquez, Alvaro
- Volkova, Anastasia

## **Z**

---

- Zimmermann, Paul
- Zipf, Peter

# Papers by Author

## **Antelo, Elisardo**

---

- A Number System Approach for Adder Topologies
- A Sum Error Detection Scheme for Decimal Arithmetic

## **Ariyaratna, Viduneth**

---

- A Parallel Method for the Computation of Matrix Exponential Based on Truncated Neumann Series

## **Asanovic, Krste**

---

- A Hardware Accelerator for Computing an Exact Dot Product

## **Bachrach, Jonathan**

---

- A Hardware Accelerator for Computing an Exact Dot Product

## **Bertilsson, Erik**

---

- Approximate Neumann Series or Exact Matrix Inversion for Massive MIMO?

# Papers by Author

## **Biancolin, David**

---

- ❑ A Hardware Accelerator for Computing an Exact Dot Product

## **Boldo, Sylvie**

---

- ❑ Round-off Error Analysis of Explicit One-Step Numerical Integration Methods

## **Bos, Joppe W.**

---

- ❑ Fast Arithmetic Modulo  $2^x p^y \pm 1$

## **Brunie, Nicolas**

---

- ❑ Modified Fused Multiply and Add for Exact Low Precision Product Accumulation

## **Chapoutot, Alexandre**

---

- ❑ Round-off Error Analysis of Explicit One-Step Numerical Integration Methods

# Papers by Author

## **Che, Shuai**

---

- Accelerating Matrix Processing with GPUs

## **Cintra, Renato J.**

---

- A Parallel Method for the Computation of Matrix Exponential Based on Truncated Neumann Series

## **Coelho, Diego F. G.**

---

- A Parallel Method for the Computation of Matrix Exponential Based on Truncated Neumann Series

## **Constantinides, George Anthony**

---

- Algorithms and Arithmetic: Choose Wisely

## **Cornea, Marius**

---

- ULPs and Relative Error

# Papers by Author

## **Costa, Timothy B.**

---

- ❑ Optimizing Matrix Multiplication on Intel® Xeon Phi TH x200 Architecture

## **Dang, Thao**

---

- ❑ Certified Roundoff Error Bounds Using Bernstein Expansions and Sparse Krivine-Stengle Representations

## **Dimitrov, Vassil**

---

- ❑ A Parallel Method for the Computation of Matrix Exponential Based on Truncated Neumann Series

## **Elliott, Sam**

---

- ❑ On Improving the Performance Per Area of ASTC with a Multi-output Decoder

# Papers by Author

## **El-Razouk, Hayssam**

---

- ❑ A New Multiplicative Inverse Architecture in Normal Basis Using Novel Concurrent Serial Squaring and Multiplication

## **Faissole, Florian**

---

- ❑ Round-off Error Analysis of Explicit One-Step Numerical Integration Methods

## **Friedberger, Simon**

---

- ❑ Fast Arithmetic Modulo  $2^x p^y \pm 1$

## **Gonzalez-Navarro, Sonia**

---

- ❑ Normalizing or Not Normalizing? An Open Question for Floating-Point Arithmetic in Embedded Systems

## **Goto, Kazushige**

---

- ❑ Optimizing Matrix Multiplication on Intel® Xeon Phi TH x200 Architecture

# Papers by Author

## **Greathouse, Joseph L.**

---

- ❑ Accelerating Matrix Processing with GPUs

## **Guney, Murat Efe**

---

- ❑ Optimizing Matrix Multiplication on Intel® Xeon Phi TH x200 Architecture

## **Gustafsson, Oscar**

---

- ❑ On Lifting-Based Fixed-Point Complex Multiplications and Rotations
- ❑ Approximate Neumann Series or Exact Matrix Inversion for Massive MIMO?

## **Higham, Nicholas John**

---

- ❑ The Rise of Multiprecision Arithmetic

## **Hilaire, Thibault**

---

- ❑ Reliable Verification of Digital Implemented Filters Against Frequency Specifications

# Papers by Author

## **Hinds, Christopher Neal**

---

- High-Precision Anchored Accumulators for Reproducible Floating-Point Summation

## **Hormigo, Javier**

---

- Normalizing or Not Normalizing? An Open Question for Floating-Point Arithmetic in Embedded Systems

## **Huot, Louise**

---

- Optimizing Matrix Multiplication on Intel® Xeon Phi TH x200 Architecture

## **Ingemarsson, Carl**

---

- Approximate Neumann Series or Exact Matrix Inversion for Massive MIMO?

## **Istoan, Matei**

---

- Resource Optimal Design of Large Multipliers for FPGAs

# Papers by Author

## **Iştoan, Matei**

---

- ❑ Flexible Fixed-Point Function Generation for FPGAs

## **Järvinen, Kimmo**

---

- ❑ Multiprecision Multiplication on ARMv8

## **Jeannerod, Claude-Pierre**

---

- ❑ The Classical Relative Error Bounds for Computing  $\text{Sqrt}(a^2 + b^2)$  and  $c / \text{sqrt}(a^2 + b^2)$  in Binary Floating-Point Arithmetic are Asymptotically Optimal

## **Joldes, Mioara**

---

- ❑ Implementation and Performance Evaluation of an Extended Precision Floating-Point Arithmetic Library for High-Accuracy Semidefinite Programming

## **Kappauf, Johannes**

---

- ❑ Resource Optimal Design of Large Multipliers for FPGAs

# Papers by Author

## **Klasson, Johannes**

---

- Approximate Neumann Series or Exact Matrix Inversion for Massive MIMO?

## **Knepper, Sarah**

---

- Optimizing Matrix Multiplication on Intel® Xeon Phi TH x200 Architecture

## **Koenig, Jack**

---

- A Hardware Accelerator for Computing an Exact Dot Product

## **Kumm, Martin**

---

- Resource Optimal Design of Large Multipliers for FPGAs

## **Langhammer, Martin**

---

- Floating Point Tangent Implementation for FPGAs
- QRD for Parallel Arithmetic Structures

# Papers by Author

## **Lauter, Christoph**

---

- Reliable Verification of Digital Implemented Filters Against Frequency Specifications

## **Lefèvre, Vincent**

---

- Optimized Binary64 and Binary128 Arithmetic with GNU MPFR

## **Lesavourey, Andrea**

---

- Efficient Leak Resistant Modular Exponentiation in RNS

## **Liu, Weiqiang**

---

- Multiprecision Multiplication on ARMv8

## **Liu, Zhe**

---

- Multiprecision Multiplication on ARMv8

# Papers by Author

## **Lutz, David Raymond**

---

- ❑ High-Precision Anchored Accumulators for Reproducible Floating-Point Summation

## **Madanayake, Arjuna**

---

- ❑ A Parallel Method for the Computation of Matrix Exponential Based on Truncated Neumann Series

## **Magron, Victor**

---

- ❑ Certified Roundoff Error Bounds Using Bernstein Expansions and Sparse Krivine-Stengle Representations

## **Malaya, Nicholas**

---

- ❑ Accelerating Matrix Processing with GPUs

## **Mitrano, Arthur**

---

- ❑ Optimizing Matrix Multiplication on Intel® Xeon Phi TH x200 Architecture

# Papers by Author

## **Monfared, Amin**

---

- ❑ A New Multiplicative Inverse Architecture in Normal Basis Using Novel Concurrent Serial Squaring and Multiplication

## **Muller, Jean-Michel**

---

- ❑ Implementation and Performance Evaluation of an Extended Precision Floating-Point Arithmetic Library for High-Accuracy Semidefinite Programming
- ❑ The Classical Relative Error Bounds for Computing  $\sqrt{a^2 + b^2}$  and  $c / \sqrt{a^2 + b^2}$  in Binary Floating-Point Arithmetic are Asymptotically Optimal

## **Negre, Christophe**

---

- ❑ Efficient Leak Resistant Modular Exponentiation in RNS

## **Pasca, Bogdan**

---

- ❑ Floating Point Tangent Implementation for FPGAs
- ❑ Flexible Fixed-Point Function Generation for FPGAs

# Papers by Author

## **Plantard, Thomas**

---

- ❑ Efficient Leak Resistant Modular Exponentiation in RNS

## **Plet, Antoine**

---

- ❑ The Classical Relative Error Bounds for Computing  $\text{Sqrt}(a^2 + b^2)$  and  $c / \text{sqrt}(a^2 + b^2)$  in Binary Floating-Point Arithmetic are Asymptotically Optimal

## **Popescu, Valentina**

---

- ❑ Implementation and Performance Evaluation of an Extended Precision Floating-Point Arithmetic Library for High-Accuracy Semidefinite Programming

## **Püschel, Markus**

---

- ❑ Optimal Streamed Linear Permutations

# Papers by Author

## **Rakai, Logan**

---

- ❑ A Parallel Method for the Computation of Matrix Exponential Based on Truncated Neumann Series

## **Reyhani-Masoleh, Arash**

---

- ❑ A New Multiplicative Inverse Architecture in Normal Basis Using Novel Concurrent Serial Squaring and Multiplication

## **Rioual, Jean-Christophe**

---

- ❑ Large Scale Numerical Simulations of the Climate

## **Rocca, Alexandre**

---

- ❑ Certified Roundoff Error Bounds Using Bernstein Expansions and Sparse Krivine-Stengle Representations

## **Rovers, Kenneth C.**

---

- ❑ On Improving the Performance Per Area of ASTC with a Multi-output Decoder

# Papers by Author

## **Schulte, Michael J.**

---

- Accelerating Matrix Processing with GPUs

## **Seo, Hwajeong**

---

- Multiprecision Multiplication on ARMv8

## **Serre, François**

---

- Optimal Streamed Linear Permutations

## **Story, Shane**

---

- Optimizing Matrix Multiplication on Intel® Xeon Phi TH x200 Architecture

## **van der Hoeven, Joris**

---

- Multiple Precision Floating-Point Arithmetic on SIMD Processors

# Papers by Author

## **van Oostrum, René**

---

- ❑ Accelerating Matrix Processing with GPUs

## **Vazquez, Alvaro**

---

- ❑ A Sum Error Detection Scheme for Decimal Arithmetic

## **Vázquez, Alvaro**

---

- ❑ A Number System Approach for Adder Topologies

## **Volkova, Anastasia**

---

- ❑ Reliable Verification of Digital Implemented Filters Against Frequency Specifications

## **Zimmermann, Paul**

---

- ❑ Optimized Binary64 and Binary128 Arithmetic with GNU MPFR
